

**E.S.P.
(Electrical Savings Plan)**

Whether buying or selling a home or you've lived in your home for 20 years, this program will benefit you!

When you join the Adams Northfield Electric E.S.P. program you will receive a complete electrical inspection plus so much more!

- No extra charge for emergency after hours service calls.

- 10% off all service calls*
(*when paid in full upon completion of service call.)

- Service calls will be scheduled within 24 hours of call.

- Warranty extension from 12 months to 18 months on all electrical workmanship.

- Exclusive offers and electrical safety tips will be provided.

Electrical Home Safety

Inspection: Dan Adams, a licensed electrician, will personally conduct an initial electrical inspection of your home. You will receive a copy of an inspection report after it has been thoroughly discussed. On average, Electrical inspections can cost up to \$300!

Main and Sub-panel Electrical

Inspection: An inspection will be conducted on your home's electrical main and sub-panels. Over time, due to humidity and high moisture in basements, the metal buss bar that breakers snap into can start to oxidize and pit causing bad electrical connections. All wiring will be inspected to ensure proper fuse and breaker size. In an average electrical panel there can be up to sixty screw terminals that hold wiring to breakers and neutral bar. These terminal screws can become loosened over time causing lights to flicker. We will tighten all screw terminals avoiding any current and future problems.

Water Pump Circuitry

Inspection: Determine if water pumps are on their own circuit, meeting the code requirement to stop external devices from tripping the pump's breaker helping to keep pumps working when you need them most!

All Accessible Outlets Tested:

Outlets will be checked to ensure they are properly grounded and they have the correct voltage & polarity.

G.F.I. Protection: All areas required by code to be G.F.I. (Ground Fault Interrupter) protected and A.F.P (Ark Fault Protected) will be examined and explained.

Smoke and Carbon Monoxide Detectors and Batteries

Inspection: Check to ensure all detectors are in proper working order.

Expert Advise: You'll be offered honest, professional advise on what electrical issues, if any, need attention.

All of this for the low initial price of \$129 then only \$19 / year thereafter!

Call today to schedule your electrical home inspection and start saving!
